Running query: insert into ingredients (name, created_at, updated_at) values ('kosher salt', now(), now()) returning id;

Running query: insert into recipe_ingredients (recipe_id, ingredient_id, created_at, updated_at) values (1, 9, now(), now());

Running query: insert into ingredients (name, created_at, updated_at) values ('ground black pepper', now(), now()) returning id;

Running query: insert into recipe_ingredients (recipe_id, ingredient_id, created_at, updated_at) values (1, 10, now(), now());

HEROKU

5/5 stars

Challenges

No one knew Rails!

Where to deploy?

Crawling for recipes and parsing for ingredients

Demo

Try it out yourself at
<https://pantri-search.herokuapp.com>
